Whole home control made
simple

INTELLIO

HOME INTELLIGENCE MADE SIMPLE

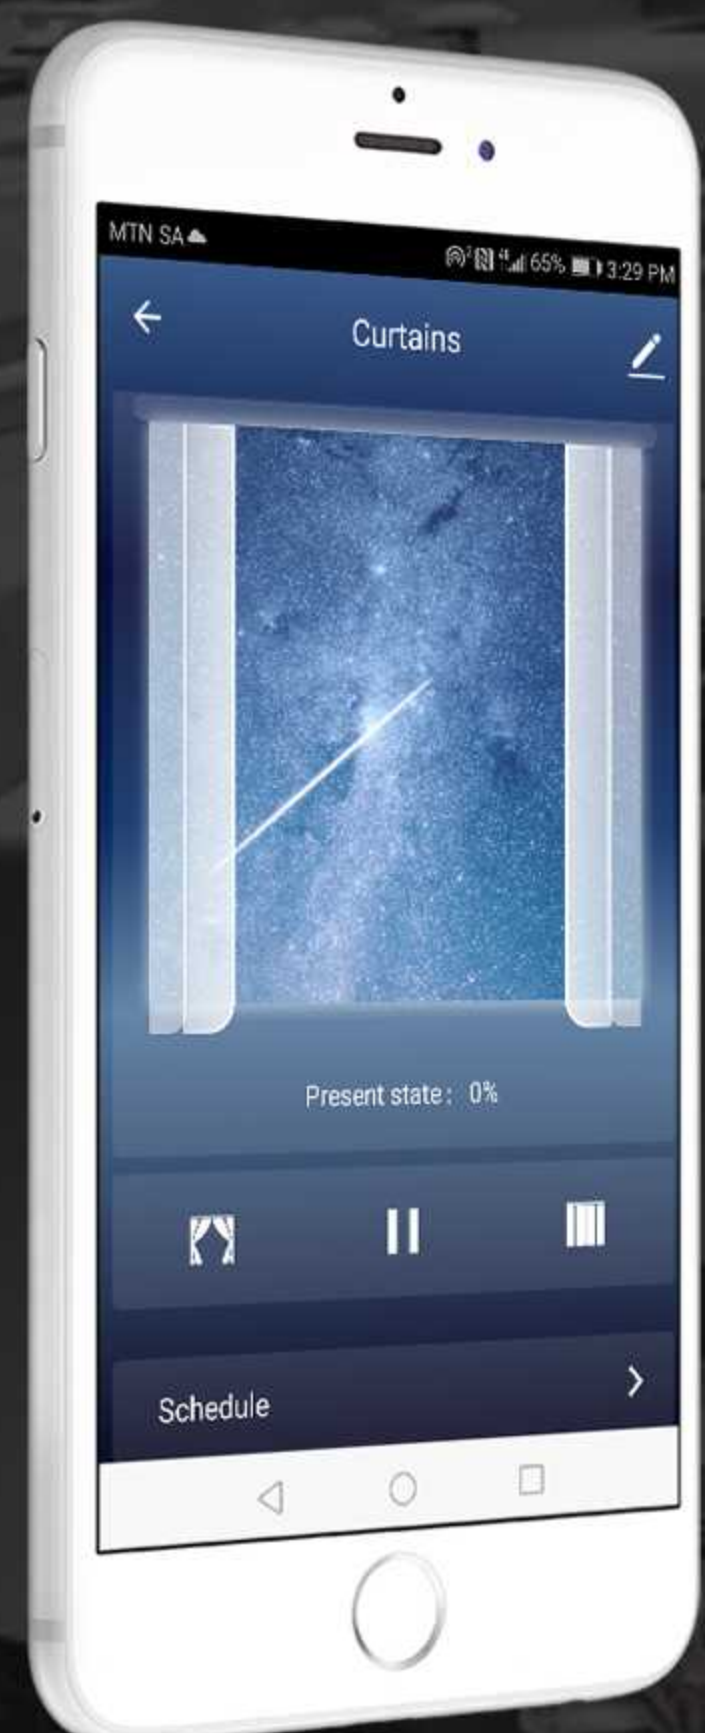

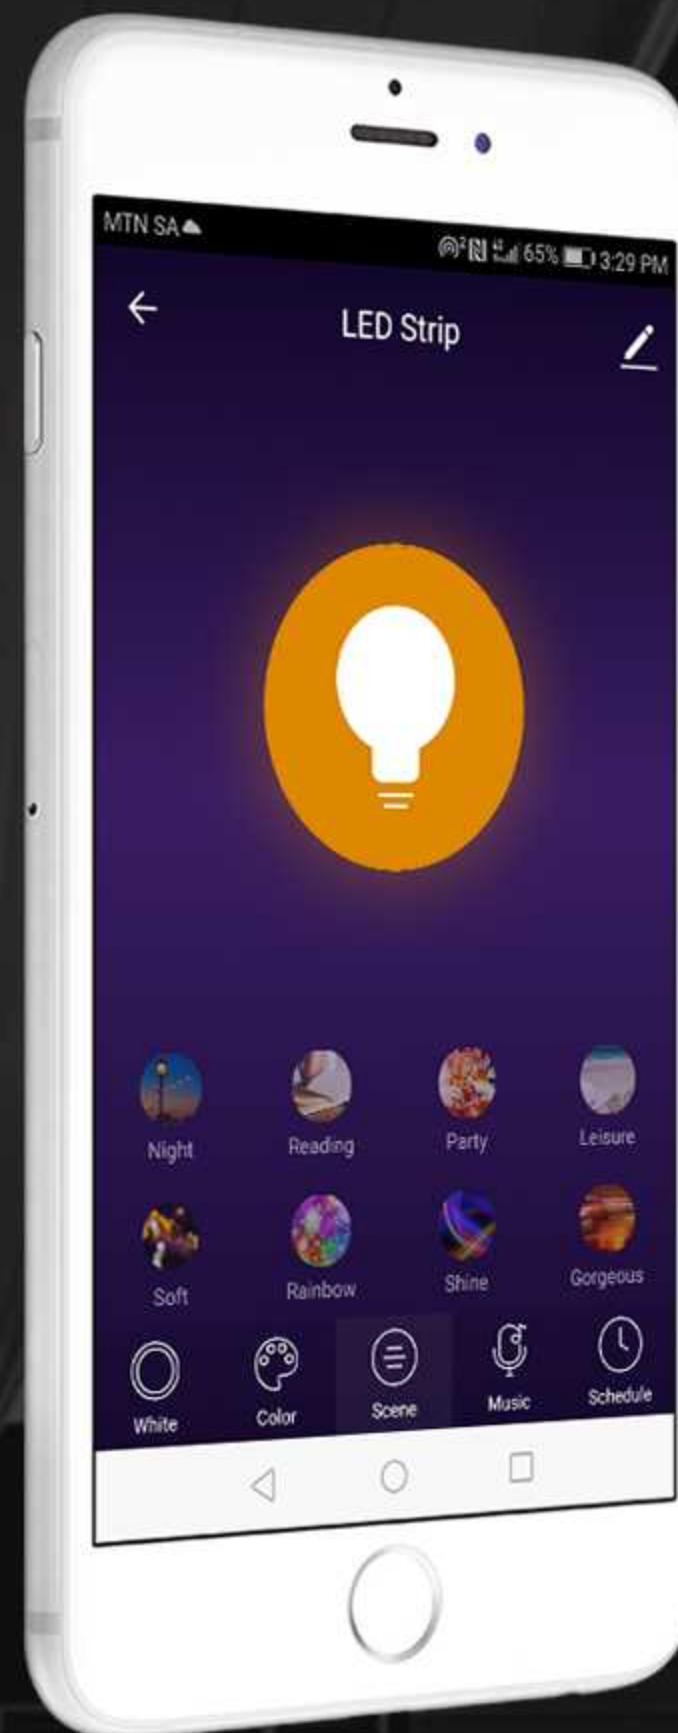

Front door control

This revolutionary lock offers more than just smart locks, it delivers the ultimate combination of security, convenience and access flexibility in a single lock. The most notable feature being compatible with wifi and our app.

LED Lighting control

Smart switch modules are one of the most vital elements of the Intellio System. You can activate them manually from the app, choosing the device and turn them on/off wherever you are, at any time.

Curtain control

A contemporary and stylish wifi control curtain that combines superior functionality with a clean and elegant appeal.

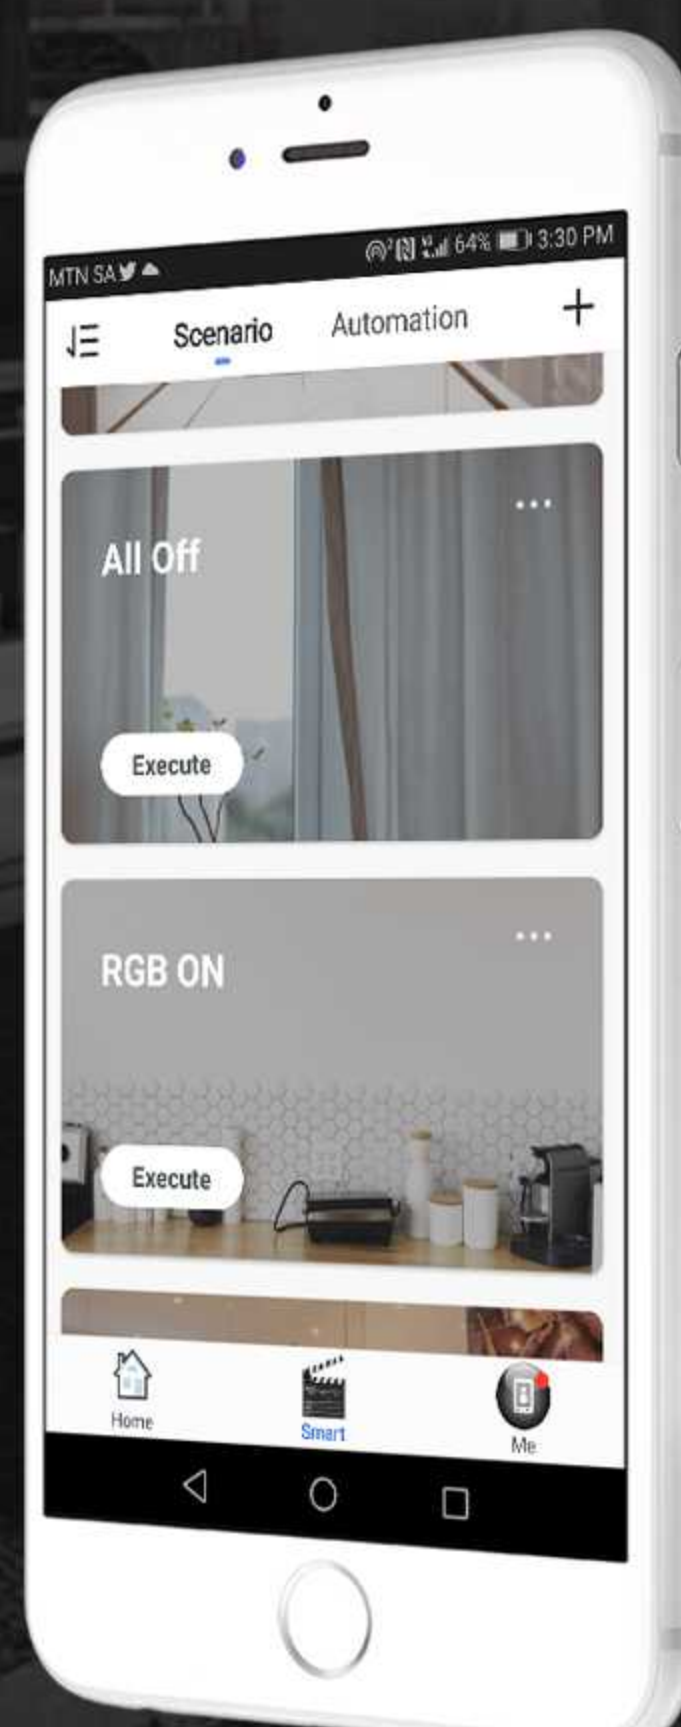

Room control

Control each room with ease and customization.

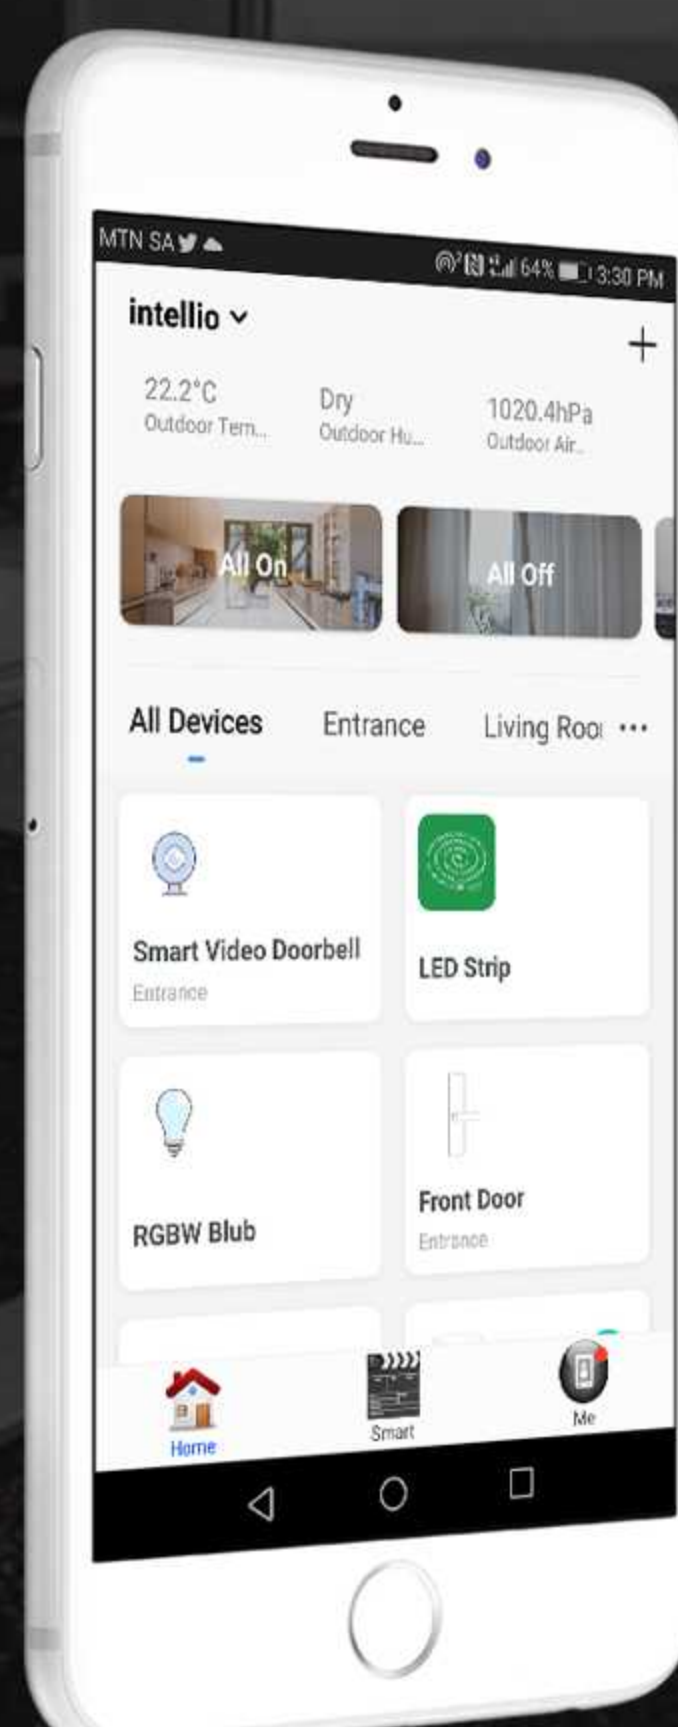

Scene control

One-Touch Scene Control has the ability to control different devices with just one touch on the button.

Total control

Safer, more convenient, and a bit more magical with Intellio Smart Home you'll be able to orchestrate virtually all of your electronics and smart home products so they can be automated or controlled (individually or all at once) by one smart home system
